SUMMARY

I am a passionate full stack developer with hands-on experience in building modern, scalable web applications. My expertise spans React and its ecosystem, backend development, and database integration, with a strong emphasis on writing secure and efficient code. Currently pursuing a Bachelor's degree in Computer Science, I contributed to the development of robust and secure applications during my tenure at Shaban DevSec. I am eager to apply my full stack and cybersecurity-informed skills in a challenging development role.
